

All-Hazards Communications Technician (COMT)

Training Course

Unit 9: Satellite Technology Awareness

Homeland
Security

OEC/ICTAP

Office of Emergency Communications / Interoperable Communications Technical Assistance Program

Unit 9: Objectives

- Explain the operational capabilities of the various types of satellite systems the COMT may encounter
- Understand the appropriate applications of the various technology resources
- Understand the basic technical and physical principles behind the appropriate technologies

Homeland
Security

OEC/ICTAP

Office of Emergency Communications / Interoperable Communications Technical Assistance Program

2

COMT UNIT 9 - SATELLITE TECHNOLOGY AWARENESS

Satellite as a Resource

- An information exchange platform
 - Bypasses local terrestrial-based platform such as land line or radio
 - Voice (including VoIP)
 - Data (including video)

Homeland
Security

OEC/ICTAP

Office of Emergency Communications / Interoperable Communications Technical Assistance Program

3

COMT UNIT 9 – SATELLITE TECHNOLOGY AWARENESS

Satellite as a Resource (Cont)

- Useful
 - Where local terrestrial-based infrastructure has failed
 - Remote locations with no access to terrestrial systems
 - Command-level voice to remote management
 - Voice for extended area incidents
 - Local Area Network (LAN) can provide incident command network access to other regional LANs and Wide Area Networks (WANs) including the Internet

Homeland
Security

OEC/ICTAP

Office of Emergency Communications / Interoperable Communications Technical Assistance Program

4

COMT UNIT 9 – SATELLITE TECHNOLOGY AWARENESS

Satellite as a Resource (Cont)

- Format
 - Fixed (typically with a large dish)
 - Mobile (Transportable or handheld)
- Requires clear access to the sky, typically southern exposure
 - Not usable in buildings, dense forest, tunnels, under bridges, and so on

Homeland
Security
OEC/ICTAP

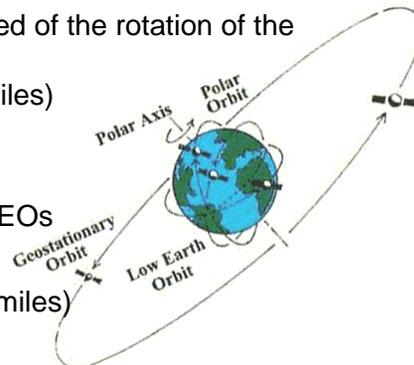

Office of Emergency Communications / Interoperable Communications Technical Assistance Program

5

COMT UNIT 9 – SATELLITE TECHNOLOGY AWARENESS

Satellite Orbits

- Geostationary Earth Orbit (GEO)
 - Orbit matches identical speed of the rotation of the earth
 - Over the equator (22,000 miles)
- Medium Earth Orbit (MEO)
 - Typical orbit (6,000 miles)
 - Not as common as GEOs/LEOs
- Low Earth Orbit (LEO)
 - Orbit is not equatorial (300 miles)
 - 48 to 66 global satellite constellation

Homeland
Security
OEC/ICTAP

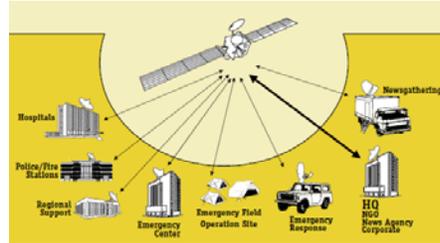

Office of Emergency Communications / Interoperable Communications Technical Assistance Program

6

COMT UNIT 9 – SATELLITE TECHNOLOGY AWARENESS

Fixed Satellite Service (FSS)

- Fixed Satellite Service
 - FSS traditionally referred to as a satellite service that uses fixed satellite infrastructure
 - New technologies allow FSS to communicate with mobile platforms

- | | |
|--|---|
| <ul style="list-style-type: none"> • Cellular Restoration • Wi-Fi Restoral • Emergency Phone Banks • Communications on the Move • PSTN Backhaul | <ul style="list-style-type: none"> • Voice-over-IP • Broadband Internet Access • Live Video • Telemedicine • Videoconferencing |
|--|---|

7

COMT UNIT 9 – SATELLITE TECHNOLOGY AWARENESS

Mobile Satellite Service (MSS) Applications

- Mobile Satellite Service
 - MSS terminals
 - Portable satellite phones and terminals
 - Mounted on a ship, an airplane, truck, or an automobile
 - Handheld terminals carried by an individual

- | | |
|--|---|
| <ul style="list-style-type: none"> ▪ Mobile Telephony ▪ Push-to-Talk Radio ▪ Emergency Response Coordination Communications ▪ Dispatch Coordination Communications | <ul style="list-style-type: none"> ▪ On-the-Move Asset Tracking ▪ Data Transfer ▪ Lone Worker Protection ▪ Environmental Monitoring ▪ Event Reporting ▪ Messaging |

Satellite Mobile/Fixed

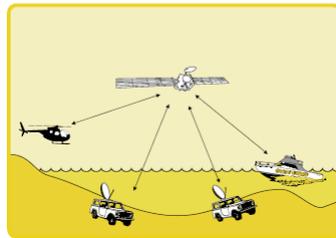

FIXED-TO-FIXED

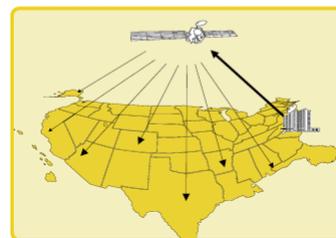

FIXED-TO-MOBILE

MOBILE-TO-MOBILE

POINT-TO-MULTIPOINT

9

COMT UNIT 9 – SATELLITE TECHNOLOGY AWARENESS

Satellite Issues

- May be costly to use
- Latency may cause issues with some applications
- May have maximum data transfer limits, causing loss of service
- Can be adversely affected by heavy clouds, rain, and fog
- Multiple terminals in the area
- Congestion at the terrestrial hub
- More of an art than a science in the non-fixed environment

Homeland
Security
OEC/ICTAP

10

COMT UNIT 9 – SATELLITE TECHNOLOGY AWARENESS

Interoperability by Satellite

- Interconnect with other communications solutions
 - Land Mobile Radio (LMR)
 - Cellular
 - Wi-Fi
 - Via generic cross-banding equipment

11

COMT UNIT 9 – SATELLITE TECHNOLOGY AWARENESS

Broadband Connectivity

- Very Small Aperture Terminal (VSAT)
 - Fixed or mobile / transportable
 - Mobile / transportable dish size .74 to 2.4 meter
 - Rapidly deployable
 - Capable of 10+ Mbps down and 4+ Mbps up data speed
 - Internet access
 - VoIP telephone
 - VPN access
 - Video conferencing

Office of Emergency Communications / Interoperable Communications Technical Assistance Program

12

COMT UNIT 9 – SATELLITE TECHNOLOGY AWARENESS

Broadband Connectivity (Cont)

- Laptop Sized Portable Broadband
 - Simple setup for rapid deployment
 - Built in rechargeable battery for portable operations
 - Up to 500 Kbps data speed
 - Telephone access while simultaneously using internet
 - Live video streaming capable
